

k-mer composition (CDS, k=6) (n=48 families)

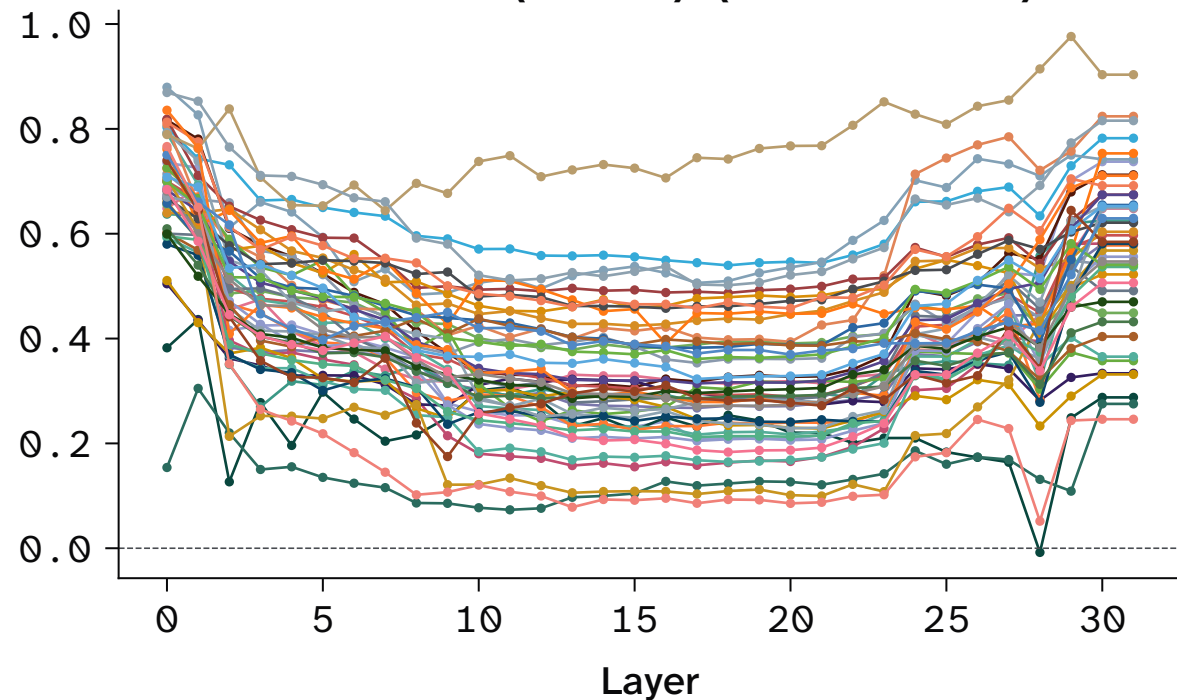

Patristic tree (n=47 families)

Species tree (mammal) (n=48 families)

GC content (control) (n=48 families)

Gene family

- | | | | |
|---------------------------|--------------------------------|-----------------------------|-----------------------------|
| ADAM metallopeptidase | Dopamine receptor | Histone deacetylase class I | Peroxidase |
| ADAMTS metallopeptidase | Ectonucleotide pyrophosphatase | Histone H4 | Peroxiredoxin |
| Adrenoceptor | Ferritin | Hox | Phosphodiesterase |
| Alcohol dehydrogenase | Flavin monooxygenase | M14 carboxypeptidase | Rab GTPase |
| Aldehyde dehydrogenase | Globins | Matrix metalloproteinase | Ras GTPases |
| Aldo keto reductase | Glutamate metabotropic | Metallothionein | Rho GTPase |
| Alkaline phosphatase | Glutaredoxin | Muscarinic receptor | Serine protease |
| Arachidonate lipoxygenase | Glutathione peroxidase | NADPH oxidase | Serotonin receptor |
| Arf GTPase | Glutathione S-transferase | Nitric oxide synthase | STEAP metalloredutase |
| Carbonic anhydrase | Guanylate binding protein | Olfactory receptors | Sulfotransferase |
| CXC chemokine receptor | Heme oxygenase | Opsins | Taste 2 receptor |
| Cytochrome P450 | Histamine receptor | P2Y receptor | UDP-glucuronosyltransferase |
